

Company PROFILE

ABOUT US

The inception of The Bird Holdings (Pty) Ltd, a burgeoning startup, marks a significant milestone as a 100% black-owned enterprise. Originating from a visionary observation by one of its Directors in March 2019, the company was established to address a discernible market gap. Its diverse portfolio encompasses Boilermaker, Welder, Fitter, Civil Works, Pipe Works, Fabrications, and Construction Services. The primary objective revolves around providing these specialized services tailored specifically for the adjacent mining sector. The core ethos of the company lies in introducing a fresh perspective to engineering services, emphasizing innovative approaches and a commitment to excellence.

A pivotal facet of The Bird Holdings' mission centers on delivering Engineering Services that redefine industry norms. The focal point extends towards offering comprehensive maintenance solutions for Heavy Mining Equipment (HME) such as Rope Shovels, Hydraulic Shovels, and Front End Loaders. The company aspires not just to offer routine services but to revolutionize the maintenance paradigm by infusing it with modern methodologies and efficient practices, catering specifically to the intricate demands of mining operations.

VISION STATEMENT

The aspiration is for The Bird Holdings (Pty)Ltd to establish itself as a premier solutions provider, focusing on expert services in crusher maintenance, plant maintenance, general fabrications, and refurbishment of earth moving equipment (specifically, buckets & bowls). This involves collaborations with prominent figures in the Mining & Construction sectors.

MISSION STATEMENT

The core commitment of The Bird Holdings (Pty) Ltd is to attain peak customer satisfaction through tailored solutions, delivering top-notch services, ensuring timely delivery, and persistently seeking avenues for enhancement.

OUR SERVICES

Boilermaker

Boilermaker services encompass a range of specialized offerings related to the construction, maintenance, repair, and inspection of boilers, pressure vessels, tanks, and other large industrial equipment.

Welder

Welder services encompass a spectrum of specialized offerings crucial in metal work, including metal joining through diverse welding techniques like MIG, TIG, and stick welding.

Fitter

Fitter services comprise a diverse set of skilled tasks focused on the installation, maintenance, and repair of machinery, equipment, and mechanical components.

Civil Works

Civil work services encompass a broad range of specialized offerings in the construction and maintenance of infrastructure.

Pipe Works

Pipe works services encompass a specialized range of tasks related to the installation, maintenance, and repair of piping systems across various industries.

Fabrications

Fabrication services encompass a wide array of specialized offerings focused on crafting and assembling metal structures, components, and machinery.

Construction

Construction services encompass a broad spectrum of specialized offerings involved in erecting, renovating, and maintaining structures across residential, commercial, and industrial sectors.
